

Smarter, Safer Student Transportation Starts with Drivege

Ford Transit with Bus Doors and Power Rear Lift

Purpose-built upfits that help move every student — walk-on or wheelchair user — efficiently and in full regulatory compliance.

School fleets face a perfect storm of tighter budgets, driver shortages and stringent rules such as Public Law 109-59 limiting vehicle capacity. Drivege solves these challenges with factory-quality conversions that let you transport 1–10 passengers without a CDL, meet ADA guidelines and protect OEM warranties. All engineered, crash-tested and serviced nationwide with Ford PRO™-qualified craftsmanship.

Ford Transporters and Shuttle Vans

Toyota Sienna

ADA-Compliant Pacifica Flex4

Drivege Vehicle Innovations

Key reasons to choose Drivege

Built for compliance – Registered NHTSA modifier; conversions re-label “Bus” chassis to “MPV,” keeping you inside the 10-occupant threshold and out of CDL territory where required.

Inclusive access – First-to-market Shift-N-Step® curb-side lift plus ADA-sized ramps and securement points ensure every student boards quickly and safely.

Flexible interiors – Patented SmartFloor® gives hundreds of seat / wheelchair layouts to right-size capacity for each trip, cutting per-mile costs.

Lower total cost – Transit-based mini-buses deliver up to 20 MPG and avoid the maintenance overhead of larger vehicle platforms.

Safety beyond the vehicle – Optional CTAA-PASS driver training reduces incidents, boosts retention and can even lower insurance premiums.

EDUCATION TYPES

- › Public
- › Private
- › Charter
- › College
- › University
- › Elementary
- › High School
- › Pre-School
