

Ram ProMaster

Flexible Seating – With or Without Social Distancing

Quality, Flexibility & Reliability

- Available with the SmartFloor™ seating system (Over 1,000 seating configurations!).
- Do more with your vehicle — From wheelchair transportation to shuttle and anything in between!

Front Wheel Drive

- Provides better traction on slippery roads.

The Versatile Ram ProMaster

- With the SmartFloor technology you can transport up to four wheelchair passengers and four non-wheelchair passengers or fourteen non-wheelchair passengers plus a driver.
- Award-winning Pentastar V6 engine comes standard.
- Optional ramp and lowering system gives you a low-maintenance alternative to power lifts.
- Rear doors swing out 260 degrees for easy loading of luggage or cargo.

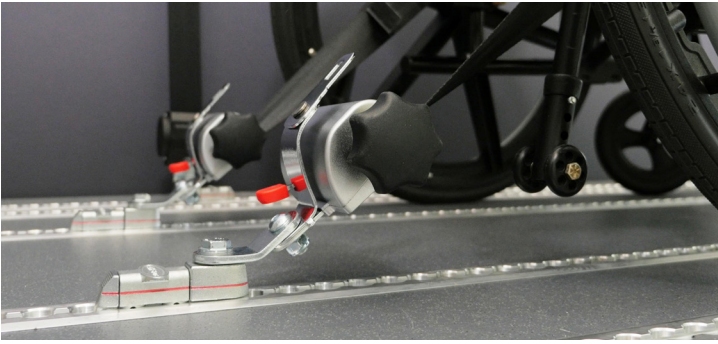

Vehicle Specification Chart

Model	Interior Length	Interior Width	Wheelbase	Overall Length	Max Cargo Height	Overall Height

The Most Flexible and Versatile Flooring in a Wheelchair Van

SmartFloor™ is a patented and innovative floor system available on the Ram ProMaster.

- Seat bases with wheels allow for quick and easy movement of seats/wheelchair positions.
- No lifting — just roll the seats to move them around the van or to the lift for removal.
- Increase your opportunities and profit potential with the flexibility of seat layout.

Shown with SmartFloor

SMARTFLOOR™
Easy • Quick • Safe Flexible

SmartRamp™ with Lowering System (Optional)

- A low maintenance alternative for transporting people in wheelchairs or hauling equipment.
- Hydraulic kneeling system lowers rear end a full 6" down to a height of 15 ¼" — creating a 9.25° ramp angle.
- Requires less maintenance.

Ramp is 9'2" long and 35.8" wide.
